WELCOME TO ECOMONDO 2025

Dear guest,

A warm welcome to the global ecosystem of the ecological transition.

Thank you for choosing to join us for this 28th chapter of a journey that began many years ago and continues to lead us toward an increasingly sustainable future. Responsibility, vision, innovation and competitiveness are the values guiding our path—like a compass pointing to tomorrow.

Over the past thirty years, the concept of ecological transition has undergone a radical evolution. Once a niche concern, it is now a cross-cutting development strategy that integrates environmental sustainability, social justice, technological innovation, and industrial competitiveness. Today, it defines our future: a shift in development models that calls for regenerating resources, innovating processes, and building an economy that can thrive while respecting the planet.

The event you are about to explore is a concrete expression of this transformation. Ecomondo tells this story and promotes its progress by offering companies, research bodies, and institutions a space for dialogue, inspiration, and collaboration to generate impactful solutions. We invite you to experience it as a place of discovery.

Be amazed right from the entrance by our striking waste art installation.

It invites us all to take a simple yet powerful action: giving new life to old electronics. From here, your journey into Ecomondo begins—a dynamic and multidisciplinary ecosystem showcasing all the opportunities of the ecological transition.

As you move through the exhibition areas and vertical districts, you will discover the most cutting-edge technologies for materials recovery and management, sustainable water resource use and the Blue Economy, bio-energy and agricultural bioeconomy, soil regeneration, environmental monitoring, and the circular economy.

You will also explore advanced solutions for waste collection and street cleaning, liveable and clean cities, paper recycling, textile fiber circularity, and trenchless technologies for reducing environmental impact in underground networks. You will meet the most promising international Start-ups in the ecological transition fields, alongside thousands of companies from around the world—those who work every day to build a more sustainable and equitable planet.

The ecological transition is also about new, circular, and sustainable skills. It is a shared path and today more than ever, it is in our hands.

Let's begin writing the next chapter of this great story. Together.

Enjoy Ecomondo 2025!

WEEE START

SWITCH ON
THE CHANGE

Start small. Achieve big.
Recycle your small **WEEE**
at **Ecomondo**

As part of **Ecomondo 2025**, taking place from November 4 to 7 in Rimini, the **WEEE-START campaign** invites visitors, exhibitors, and stakeholders to contribute to sustainability by **disposing of small electronic waste** at a dedicated collection point in South Hall, featuring a **special installation** made from recycled materials.

This initiative turns awareness into action, promoting **responsible disposal** and circular practices to give **critical raw materials** a second life.

WATER BLUEECONOMY

WATER CYCLE BLUE ECONOMY

The water sector is taking on greater importance within Ecomondo.

The technologies on display span the entire integrated water cycle, the leading utilities are present, and workshop areas focused on best practice sharing have been set up.

The show also features the Blue Economy District, focused on solutions for protecting seas and coastlines, and the Trenchless District, which highlights low-impact, no-dig technologies to broaden the offering.

VISITA IL TRENCHLESS DISTRICT PAD. B8

Perché scavare quando esistono soluzioni alternative?

Trenchless o No-Dig significa essenzialmente ricercare ed applicare soluzioni tecnicamente avanzate per la posa, manutenzione e risanamento delle reti dei sottoservizi, limitando la manomissione delle strade, lo scavo e la movimentazione dei terreni, riducendo il disturbo alle attività economiche e di svago, il consumo energetico, i costi socio-ambientali ed incrementando la sicurezza dei propri cantieri.

YOUR PROVEN SOLUTION

Invest in the Best to Maximise Revenue

Eriez patented the world's first Eddy Current Separator in 1969. Today, our full range of recycling equipment can be found all over the globe, increasing recoveries and maximising revenues.

Eriez. Always the Right Choice.

Eddy Current Separators from Eriez effectively remove nonferrous metals in municipal recycling facilities (MRF), automobile shredder residue (ASR), plastics, glass cullet, electronic scrap, and more.
