CDEPE

Chengdu International Environmental Protection Expo is one of the largest green technology trade show in Western China market. The show is co-organized by Sichuan Environmental Protection Industry Association (SCEPI) and Europe China Environmental Exhibitions (ECEE) – an Italian Exhibition Group's Chengdu based company.

WHY CHENGDU

China's south-western regions

and in particular the **Chengdu-Chongqing economic circle**, contribute around 30% of the western China's total GDP and are set to play a key role in pursuing the road map towards the complete decarbonisation of Chinese production by 2030.

Chengdu

will play a key role in the **One Belt One Road project** and **Yangtze River Economic Belt** established by China's central government and is expected to become the international logistics centre of Southwest China.

By investing in Chengdu

investors gain access to Chinese trade channels in an area that has a **strong demand** for international knowledge and technology, avoiding the more crowded and competitive markets such as Shanghai, Beijing, Shenzhen or Guangzhou.

WHY PARTICIPATE

> Direct access to the **fast-growing** green technology market of southwestern China

> One-on-one **matchmaking** opportunities with Chinese buyers and government institutions

> Rich contents and **learning** opportunities, thanks to technical forums and international workshops that take place within the show and focus on **B2B** and **B2G** business opportunities

> A strong local institutional support and participation of **government** bodies and industry **associations**

CDEPE FACTS & FIGURES

7 COUNTRIES AND REGIONS

25,000 SQM EXHIBITION AREA

396 EXHIBITORS  +27%

28,356 VISITS  +52%

10 CONFERENCES

VISITORS

VISITOR'S MAIN BUSINESS

- 32%** Engineering/Operation/Supervision
- 19%** Municipal Related Institutions
