**Your Trusted Partner in
Recycling Logistics**

Walking floor

Huckepack by rail

No storage task is too small or large for us to handle. Whether it's by road with our advanced Walking Floor and Tautliners, by rail with Huckepack trailers, or by sea with container services, we've got you covered.

Road, rail or sea?

All Logistics is your reliable logistics partner.

Founded in Denmark in 2012, All Logistics Group set out with a simple goal: to be the best in logistics. We've grown a lot since then, becoming known for our dependability and fresh ideas in the world of transportation, especially when it comes to recycling.

Our path from a small company to an internationally renowned logistic partner shows how dedicated we are in taking care of our customers, using the latest technology and finding smart solutions to any challenge.

Today, All Logistics is a name people trust in the recycling business. We offer a wide variety of ways to move your materials. With our modern fleet of Walking Floor, Tautliner, and Huckepack trailers, we make sure your recycling materials get where they need to go in Europe - safely and efficiently. We have flexible options for transporting your materials by road, rail, or sea, ensuring that they arrive smoothly and environmentally friendly.

Our expertise

- Walking Floor, Tautliner by road, Huckepack by rail, and container solutions by sea
- Reliable, sustainable transportation across Europe
- Fully equipped fleet with waste permits and ADR certification

What We Offer

All Logistics Group provides a One-Stop Solution for the recycling industry, offering both transport and storage services.

Our fleet ensures reliable, eco-friendly transport by road or sea across Europe.

Additionally, our warehouse in Fredericia, Denmark, can store up to 100,000 tons of RDF and waste, with an environmental license for handling various waste types efficiently.

Better digital transport planning
Linehaul and FTL

- Keep track of the transport operations from the calendar planning view
- Efficient planning and re-planning through drag/drop of transport orders to trucks and trailers
- Simple communication with drivers through the Truckplanner Go app for iOS and Android

Better planning of multi-hub transports
Distribution and Logistics

- Simple planning of multi-leg transports using split orders
- Optimize routes and keep track of ETA for on-time deliveries
- Scanning of barcodes for traceability and add electronic signatures or pictures as POD

Better utilization of resources
LTL and Partloads

- Plan multiple orders to trips and assign available truck, trailer and driver
- Filter orders on zones or use the map to see pickup and deliveries to match a trip
- Keep track of trip profit using automated price agreements with customers and suppliers
