

# SHREDDERS & SYSTEMS FOR WASTE RECYCLING

FOR REC markets a wide range of industrial grinders and shredders able to meet the various demands from the solid waste recycling and disposal world.

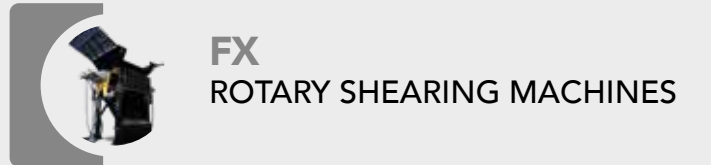

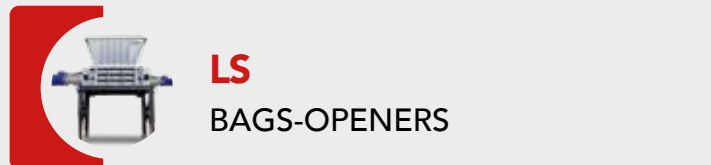

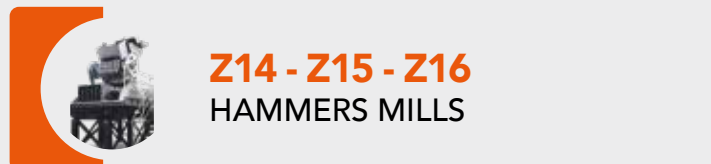

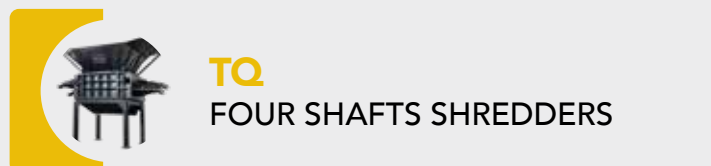

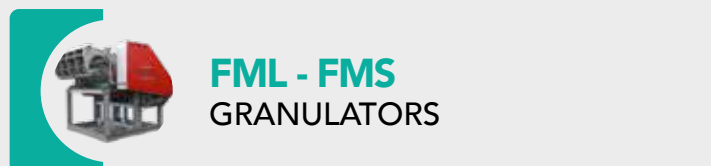

With design, production and services centralised in a single facility, FOR REC has achieved the important goals of manufacturing high quality products that provide a series of real advantages for customers (professional advice, assistance and maintenance, spare-parts warehouse, custom solution).

Designed to guarantee high production standards and to be used in continuous cycles, FOR REC grinders and shredders fully meets various needs and completely satisfy every expectation with the maximum reliability.
